Iyengar Yoga

Iyengar Yoga is a method of Hatha Yoga developed by Mr. B.K.S Iyengar of Pune, India. Iyengar's teachings are deeply grounded in the ancient yoga tradition. Iyengar Yoga combines classical Yoga traditions with innovative approaches including: an emphasis on the standing poses, using props, specific sequencing of the poses, and careful individual adjustments. Iyengar Yoga places special focus on developing strength, endurance, and correct body alignment while maintaining flexibility and encouraging relaxation. Your self-image, posture, flexibility and coordination can be enhanced and you may be relieved from depression or fatigue while experiencing greater concentration and more enjoyment out of life.

Looking for the right level of class for you?

At Rushing Water Yoga we meet the students where they are and make sure you are challenged and are working at the place and pace that is correct for you and your body. You will find this in every level of class. We encourage you to come to a beginning level class and see for yourself.
